

Velcro Holga

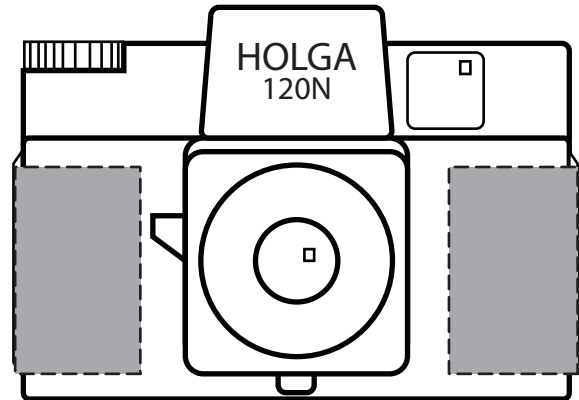

Follow these simple instructions to keep your HOLGA back from falling off

Hook Sticks on Holga

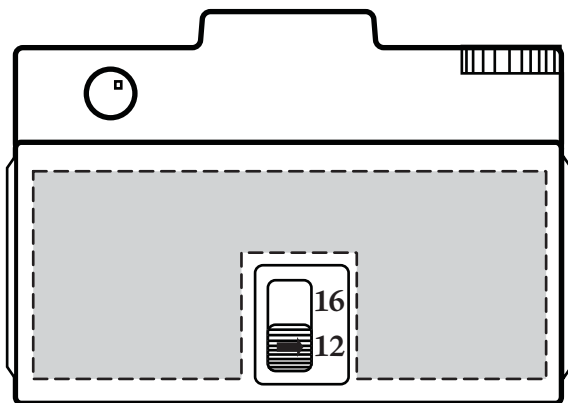

Cut 2 pieces of the Hook side (has adhesive back) and stick onto the front side of your HOLGA.

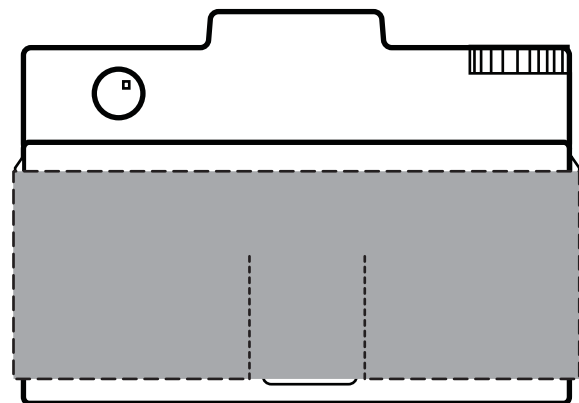

Loop The furry stuff

No cutting is required for the Loop end (furry stuff with no adhesive back)

Cut a piece of Hook to go along the back of the HOLGA. Cut out a section to go around the film counter window

Cut two slits up on the two sides of the film counter window. This will act as a flap to reveal the film counter window. Also prevents light leaks.

DIY Kit available from The Light Leaks Shop: <http://shop.lightleaks.org>
